

HIGH DEFINITION WEAPON CAMERA

ShotTrak HD

ATN introduces the smartest, most multi-featured weapon camera ever: the ShotTrak HD. Mount on any gun, your bow, or even your hat to capture incredible color video of your target in full HD (1920 x 1080p). Easily switch between lower and higher magnification lenses (wide field and long range) to match your scope's magnification or show the lay of the land. Most action cameras will only give you wide angle view of your surroundings, making your target tiny even on a big screen, but ATN's ShotTrak HD lets you show the perfect view every time. It's the perfect way to show off your victories to your friends back home and online.

With its sharp, rear panel LCD display, you can immediately review your videos and images, adjust your settings, and delete unwanted shots. Switch between video or still images with the push of a button. The screen automatically adjusts the video image right-side up regardless of what position the camera is mounted. Expand its built-in 64Mb memory instantly with any SDHC card (up to 32Gb). Capture sound with its onboard microphone or attach an external mic or speaker. Fully water resistant, you can take it with you in any kind of weather. With the ShotTrak HD weapon camera as your spotter, now no one has to miss what you're shooting. Share your hunting stories in vivid color and relive your memories forever.

- Picatinny rail mount
- Accelerometer automatically rotates the image based on where the camera is positioned
- Comes with 2 interchangeable lenses, wide field and long range
- High-capacity rechargeable Li-ion battery 3.7V/1800mA
- 4 hours of video recording
