

Brilliant Aiming Solutions™

**Product Guide** | 2011

# What's New in 2011

## **Trijicon Adjustable LED RMR™**

The latest addition to the Trijicon RMR line-up introduces a new level of refinement to the toughest red dot sight on the market. With eight brightness settings, including a Super Bright, shooters can dial in their aiming point to suit their conditions and preference.

## **Trijicon HD™ Night Sights**

These new three-dot tritium heavy-duty night sights were specifically created for tactical shooters. With their yellow or orange photoluminescent paint outline, tall blade and wider U-shaped notch, the high-definition sight design increases visibility for quicker sight acquisition—even in transitional lighting.

## **Trijicon TrijiDot™**

Trijicon is proud to offer this simple but effective bead sight specifically designed for shotguns. Utilizing Trijicon's fiber optic technology, it collects ambient light to provide a brilliant aiming point in a wide range of lighting conditions.

## **Trijicon AccuPin™ Bow Sight and AccuDial™ Mount**

The Trijicon AccuPin brings brilliant aiming solutions to the bow. Featuring a triangular aiming tip and clear aiming pin it is the fastest and most accurate bow sight in the field.

## Trijicon® – A Brilliant Choice

Trijicon has led the industry in the development of superior any-light aiming systems since the company's founding in 1981. Incorporating more than two decades of innovation, Trijicon's self-illuminating riflescopes and sights are the most advanced aiming systems available today.

### **TRIJICON'S VISION**

Guided by our values, we endeavor to have our products used wherever precision aiming solutions are required to protect individual freedom.

### **TRIJICON'S MISSION**

Guided by our values, we will continue to be a leader in the design and manufacture of high quality, innovative sighting systems for use by law enforcement, military and individual customers.

Trijicon founder Glyn Bindon's interest in self-illuminated sights became the inspiration for using tritium (a hydrogen isotope) to provide scope luminescence. He also devised a way to bring both-eyes-open shooting and magnified optics together for the first time in a discovery called the Bindon Aiming Concept™ (BAC).

In selecting Trijicon's Brilliant Aiming Solutions™, you will not only join the most discriminating hunters, law enforcement officers and military professionals, but also the world's leading gun manufacturers.

To learn more about Trijicon sights and scopes and their specifications, call 1-800-338-0563 or visit [www.trijicon.com](http://www.trijicon.com).

## Brilliant Aiming Solutions™

For those who are seeking their once-in-a-lifetime opportunity to take home a trophy; or a combat optic that has earned the reputation of being the most sophisticated and dependable on the battlefield; or an aiming system that stands out for accuracy and performance for those who protect and serve—choose Trijicon.

### HUNTING

Hunters know that the best hunting is often done at sunrise or sunset when light is scarce and game is active. That's when the brilliance of self-illuminated Trijicon optics comes through for you. Trijicon aiming systems empower you to take low-light shots with confidence. That's because our revolutionary self-luminous reticle is clearly visible against the game—even at dawn or dusk.

### MILITARY

Clearing a dark basement, securing a sunlit alley, or engaging an enemy at 600 meters ... on patrol, you can never be certain of your situation, so you better be sure your combat optic is a Trijicon. With dual-illuminated reticles, Trijicon aiming systems transition to all environments – from close quarters to long range – instantaneously. Battery failure is never a worry.

### LAW ENFORCEMENT

From fast-action, close-encounter felony arrests to stand-offs with barricaded suspects and more, tritium-illuminated Trijicon optics are field proven in all aspects of law enforcement. Whether on your side arms, long guns or patrol carbines, Trijicon aiming systems deliver reliability you can count on. Your advantage is a trusted optic with rugged, patrol-tested durability under any circumstances.

### Dry Nitrogen Filled

Prevents corrosion and eliminates fogging.

### Solid Black Matte Finish

Eliminates glare and light reflection.

### Trijicon Fiber Optics

Automatically adjusts the brightness level and contrast of the Trijicon Aiming Point reticle to available light conditions.

### Manual Brightness Override

Easily adjust the Trijicon Aiming Point brightness to your personal preference.

### Easy-Focus Eyepiece

Ensures unsurpassed edge-to-edge optical clarity.

### Longer Eye-Relief

Provides unparalleled eye-relief and protects against high-impact recoil from larger caliber rifles.

### Limited Lifetime Warranty

Assembled in the USA

### Scope Body is Crafted from Aircraft Quality, Hard-Anodized Aluminum

All-weather rugged construction protects against the toughest elements.

Model TR20G  
3-9x40

### Multi-Layer Coated Lenses

Superior clarity and light gathering capabilities with zero distortion.

### Trijicon Tritium Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition—with no batteries to fail.

### Select from Five Different Models:

▼ 1-4x24   ▼ 1.25-4x24   ▼ 3-9x40   ▼ 2.5-10x56   ▼ 5-20x50

## Trijicon AccuPoint® Series

With its advanced fiber optics and numerous intelligent features, the Trijicon AccuPoint offers the ultimate in precision aiming for all light conditions and even the harshest environments.

- ▼ The Trijicon AccuPoint series combine advanced, self-luminous aiming technologies and superb clarity with precision craftsmanship to create one of the world's premier riflescopes.
- ▼ Aiming is believing: Once you place its dual-illuminated reticle on your target, you will never go back to a sight with standard black crosshairs.
- ▼ The Trijicon AccuPoint is available with the original triangle reticle, as well as a selection of precision crosshairs. Each design supports the Bindon Aiming Concept™ (BAC) and allow you to keep both eyes open while tracking, taking aim, and shooting.
- ▼ All models in the Trijicon AccuPoint Series operate battery-free—eliminating the potential for failure during critical moments in the field.

Model TR23  
5-20x50

**Triangular Aiming Point and Clear Pin**  
Precision aiming point with unobstructed view of target.

**High Impact Shade Shield**  
High visibility aiming circle for optimal aiming point acquisition and protection.

**AccuDial™**  
Large, laser etched dial precisely locks in yardage without the tape.

**Tritium-Phosphor Lamp & Fiber Optics**  
Provide illumination for any light condition without batteries.

Model BW50G-BL  
Trijicon AccuPin™ and  
AccuDial™ Mount

**Field Replaceable Pin**  
Finger tighten design makes replacement quick and easy.

**Fully Housed Sight Level**  
Helps line up perfect shots.

**Anodized Aircraft-Grade 6061-T6 Aluminum**  
Made in the USA and so tough it's guaranteed for life.

**BowSync™ Technology**  
Infinitely variable transmission enables exact range adjustment and synchronization for any bow/arrow combination.

Limited Lifetime Warranty

Available in the Following Finishes:

Matte Black

Lost Camo™

Realtree AP™

## Trijicon AccuPin™ Bow Sight

Created by the world leaders in illuminated riflescopes, Trijicon now brings their brilliant aiming solutions to the archer. The Trijicon AccuPin™—a breakthrough in bow sight technology, design and engineering.

- ▼ The heart of Trijicon AccuPin's innovative design lies in its triangular aiming tip and clear aiming pin. With zero obstructions, this one-of-a-kind configuration creates an aiming point that actually points to your target instead of obscuring it and gives archers the most precise bow sight available.
- ▼ The AccuPin utilizes Trijicon's acclaimed dual-illumination system. This combination of fiber optics and tritium makes the AccuPin the brightest pin sight on the market and lets you acquire targets with complete confidence and without batteries.

- ▼ The Trijicon AccuDial™ mount—equipped with BowSync™ technology— features an infinitely variable transmission, that enables exact range adjustment and synchronization for any bow/arrow combination. Its laser etched dial makes on-the-fly adjustments quickly and accurately—without having to rely on a clumsy strip of tape. Together, the AccuPin and AccuDial form a refined system that stands as a benchmark for sight and mount integration.

The Trijicon AccuPin™ and its combination of fiber optic and tritium illumination are Pope & Young Legal.

Model BW50G-BL  
Matte Black

---

### Broad Band Anti-Reflective Coated Lenses

Multi-coated lenses provide superior clarity and light gathering capabilities with zero distortion.

---

### Trijicon Tritium Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate for 15 years.

---

### Totally Battery-Free

Trijicon ACOG® delivers increased hit potential in all lighting conditions—without the use of failure-prone batteries.

---

### Waterproof to 500 Feet / 150 Meters

Dry nitrogen filled to eliminate fogging.

---

### Limited Lifetime Warranty

Made in the USA

---

### Trijicon Fiber Optics

Automatically adjust the brightness level and contrast of the Trijicon reticle to available light conditions.

Model TA31  
4x32 BAC

---

### Internally Adjustable

Since only the prism housing moves, the Trijicon ACOG is much more rugged than conventional designs.

### Select from Nine Different Models:

- ▼ 1.5x16    ▼ 2x20    ▼ 3x24    ▼ 3.5x35    ▼ 4x32    ▼ 5.5x50    ▼ 6x48
- ▼ 1.5x24    ▼ 3x30

Product covered by Foreign Patents including AT, FR, GB, CH 0,315,379, CA 1,305, 341, JP 2,632,976, and ZA 888,185.  
Product configuration protected by US and Foreign Trademarks including US Reg. Nos. 3,047,581, 3,047,582, 3,190,442.

## Trijicon ACOG® Series

You never know where duty will find you. But you can arm yourself with the best scope around. The Trijicon ACOG is rugged, reliable and ready to respond to any situation.

- ▼ Powered by a tritium-phosphor lamp, the Trijicon ACOG's reticle glows in low-light conditions, while advanced fiber optics automatically adjust the brightness level and contrast of the reticle in brighter light conditions.
- ▼ The scope's ranging is built into many of its reticles, so you only need to set zero once for a multitude of ranging distances.
- ▼ The Trijicon ACOG also offers large Eye Volume™, giving you greater leeway – fore and aft, and from side to side – with which to see through the lens.
- ▼ The Trijicon ACOG is crafted with a tough, military-grade aluminum-alloy housing and is waterproof to depths of 500 feet—making it nearly indestructible.
- ▼ The Trijicon ACOG is the official Rifle Combat Optic of the U.S. Marine Corps and the U.S. Army. In addition, the Trijicon ACOG 4x32 is fielded by the Special Operations Forces.

Model TA11F  
3.5x35

---

**Trijicon Fiber Optics**

Automatically adjusts the brightness level and contrast of the reticles to available light conditions.

---

**Trijicon Tritium Phosphor Lamp**

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate up to 15 years.

---

**Adjustable Elevation**

---

**Military-Grade Aluminum-Alloy Housing**

Investment Cast aircraft aluminum-alloy housing provides for a nearly indestructible sighting system.

---

**Adjustable Windage**

---

**Trijicon Reflex Provides a True-Color Multi-Coated Lens**  
Creates wide-band light transmission.

Model RX30-23  
1x42

---

**Limited Lifetime Warranty**

Made in the USA

---

**Select from Two Different Models:**

▼ 1x24

▼ 1x42

## Trijicon® Reflex Series

When you're in the field, it's you, your weapon and your Reflex. The Trijicon® Reflex helps you quickly engage and lock onto moving targets, providing speed and precision for critical situations. And the Trijicon Reflex RX30 provides for an even wider peripheral view. It's the precise advantage you need.

- ▼ The Trijicon Reflex RX30 sight features a 42mm, clear-aperture lens for a generous field-of-view and the largest sight picture possible. It allows you to move the firearm freely and remain on target at multiple shooting angles when surveying an area.
- ▼ The Trijicon Reflex is available with three reticle options to match your shooting requirements: a 12.9 MOA triangle, a 4.5 MOA dot, and a 6.5 MOA Dot.
- ▼ Dual-illuminated and parallax-free, the Trijicon Reflex offers increased field-of-view capabilities that provide fast both-eyes-open target acquisition and accurate aiming for the military, law enforcement and hunting enthusiasts.
- ▼ Batteries? None needed; it's totally battery-free.
- ▼ The Trijicon Reflex was selected for the SOPMOD M4 Accessory Kit fielded by all U.S. Special Operations forces.

Model RX06-II  
1x24

### Trijicon's Tritium-Illuminated Reticle

Thanks to Trijicon's tritium powered phosphor lamp, the reticle provides a distinct aiming point, even in total darkness.

### Trijicon Fiber Optics

Trijicon's ultra-reliable fiber optics system adjusts the brightness level and contrast of the reticle to the available ambient light. The chevron-shaped reticle presents a crisp, clear aiming point, even in the brightest light.

### Broad Band Anti-Reflective Coated Lenses

Allows optimum light transmission and optical clarity.

Model TX30  
1x30

### Battery Illumination Switch

### Threaded Objective and Eyepiece

Enables mounting of various adapters, secondary mounts or lens covers, including flip covers.

### Waterproof

Completely sealed and waterproof to a depth of 100 feet / 30 meters.

### Limited Lifetime Warranty

Made in the USA

### Model Selection:

▼ 1x30

### 30mm Tube

Allows use of 30mm rings and scope mounts.

### Adjustable Windage and Elevation

Sealed external windage and elevation adjusters. (Normal adjustment range  $\pm 1.25$  degrees.)

### On-Call Battery Backup

Trijicon's advanced battery system provides a backup light source for a crisp, luminous reticle at all times.

## Trijicon TriPower®

When you've only got one chance at the perfect shot, make sure you've got the Trijicon TriPower. The world's first triple-illuminated sight, it will perform in broad daylight, at night, and everything in between.

- ▼ The Trijicon TriPower is a fail-safe sighting system that delivers a clear aiming point at all times—making it ideal for fast-moving, close-in shots.
- ▼ During daylight hours, a fiber-optic system adjusts the brightness level and contrast of the reticle. In low-light conditions and even total darkness, a tritium-phosphor lamp illuminates the aiming reticle. An on-call battery system provides a backup light source for reinforced confidence no matter what the situation.
- ▼ The Trijicon TriPower goes beyond power-source redundancy to ensure reliable performance in the field. Its military-grade forged aluminum-alloy one-piece housing provides for a nearly indestructible sighting system.
- ▼ Designed for mounting on long guns or side arms, the Trijicon TriPower features a red, chevron-shaped reticle that's parallax-free for fast target acquisition.

Model TX30  
1x30

### Glass Lamps

Filled with pressurized tritium gas, lamps glow bright at night.

### Metal Body

Each sight is manufactured to fit specific handgun makes and models.

### Silicone Rubber Cushion

Gives additional shock-protection to tritium filled glass lamps within the aluminum housing.

### 12-Year Power Source\*

### Limited Lifetime Warranty

Assembled in the USA

### Large Brightly Colored Front Ring

Glow-in-the-dark photoluminescent powder mixed in paint to aid visibility and quicker target acquisition upon room entry.

### Extra-Large Front Dot

Provides a bright, distinctive sighting picture.

Model GLO1  
Bright & Tough™  
Night Sights

Model GL101Y  
HD™ Night Sights

### Trijicon Tritium-Phosphor Lamp

Tritium-filled glass lamp provides superior illumination that is guaranteed to last at least 12 years.\*

### Sapphire Window

Each Trijicon tritium lamp is capped with a sapphire jewel which helps to evenly distribute the light from the tritium lamp as well as protect it from solvents and puncture.

### Black Rings

To enhance focus on front sight.

### Wider U-Shaped Notch

### Angled and Serrated Surface

To reduce glare.

### White Rings

All Trijicon Bright & Tough™ Night Sights feature a white ring around the glowing dots for unequalled daylight visibility.

### Protective Aluminum Cylinders

Contains and protects the tritium gas filled lamps from heavy recoil and harsh cleaning solvents.

## Three Trijicon Bright & Tough™ Night Sights Color Options:

Standard green rear dots glow brightest, while optional orange\* or yellow rear dots provide contrast.

## Two HD™ Night Sights Color Options:

## Trijicon TrijiDot™ Fiber Optic Shotgun Sight\*\* Color Options:

\*Orange tritium lamps are guaranteed for 5 years. Non-warranty lamps can be replaced by Trijicon for a nominal fee.  
\*\*Does not contain tritium.

## Trijicon® Night Sights

Featuring glowing, self-illuminated lamps for a distinctive shooting picture, Trijicon® Night Sights are the reliable choice for all light conditions, providing superior illumination and impressive accuracy.

- ▼ Trijicon Bright & Tough™ Night Sights are three-dot iron sights that increase night-fire shooting precision by as much as five times over conventional sights. With three tritium-filled phosphor lamps to provide battery-free illumination day or night and a patented shock-resistant housing system, it's no wonder they are the first choice of so many major handgun manufacturers.
- ▼ The HD™ Night Sights were specifically created to address the needs of tactical shooters. Their tall front blade with photoluminescent ringed aiming point and specially shaped black-outlined rear sights, combine to increase visibility and quicken sight

acquisition. Additionally, the front surface is steeply hooked to assist in emergency one-handed slide operation. The new HD Night Sights are designed to shine—even in the most demanding conditions.

- ▼ The Trijicon TrijiDot™ is a bead sight designed for the unique demands of the shotgun. Utilizing Trijicon's fiber optic technology and sapphire cap it collects ambient light to provide a brilliant aiming point in any lighting conditions. Constructed of anodized 6061-T6 aluminum, it's built to withstand shotgun recoil and white-hot barrel temperatures.

Model SH02G  
Trijido™

---

### Bright LED Illumination

Auto-adjusts for brightness in any light situation.

---

### True-Color Multi-Coated Lens

Creates a wide-band light transmission for minimal change in target area color.

---

### Adjustable Windage

Easily adjustable without special tools. 1 MOA per click.

---

### 7075-T6 Military-Grade Aluminum-Alloy Housing

For extreme durability.

---

### Long Lasting Battery Life

Battery lasts up to 4 years at brightness setting 4 on Adjustable LED Version. LED Version battery designed to last up to 2 years during normal usage.

---

### Waterproof

Completely waterproof to a depth of 66 feet / 20 meters.

---

### Limited Lifetime Warranty

For LED/Adjustable – Two year warranty on electrical components from date of purchase.

---

Made in the USA

### Adjustment Button

Allows for manual brightness control.

Model RM06  
Adjustable LED Version

### Adjustable Elevation

Easily adjustable without special tools. 1 MOA per click.

---

### Trijicon Fiber Optics

Automatically adjusts the brightness level and contrast of the reticle to available light conditions.

---

### Trijicon Tritium Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate up to 15 years.

Model RM05  
Dual-Illuminated Version

## Trijicon RMR™ (Ruggedized Miniature Reflex) Series

When precision is the only option, your best option is the Trijicon RMR. Built to provide optimum red-dot visibility with a minimal profile, you can acquire and hit your target quickly and more accurately.

- ▼ The Trijicon RMR is designed with a rugged aluminum housing and a unique shape that distributes shock away from the lens, making it more than tough enough for any military and law enforcement applications.
- ▼ On its own, the compact Trijicon RMR is perfect for close quarters situations. However, it also can be teamed up with the Trijicon ACOG® or Trijicon AccuPoint® to create a combination that offers the ultimate in fast / short-range target acquisition and precision aiming at extended distances.
- ▼ Accuracy is further enhanced with adjustments for windage and elevation. And clarity is assured with the sight's ultra-clear, hard coated lens.
- ▼ The RMR is available in three models. The first model utilizes an innovative high efficiency LED and adjusts the aiming point brightness automatically. The second model also features a high efficiency LED and has automatic and manual brightness controls. The third option is the dual-illuminated battery-free model featuring Trijicon fiber optics and tritium.

Model RM01  
LED Version

---

### Compact and Universal

High-resolution, permanently aligned night vision sight for use in front of mounted ACOG®.

---

### Multi-Use Design

Optimized for close combat assault rifles including the M4, M16, SCAR-L, HK416 and AK47.

---

### Shock Mitigation System™ (SMS)

Integrated to offer additional protection to the I<sup>2</sup> tube when used with high recoil weapons platforms.

---

### Low 1.5 in. Optical Centerline

Does not alter day sight centerline (sighting system is free from parallax errors)

---

### Fast f/0.9 Catadioptric Lens

Provides a brighter and sharper image in starlight.

---

### Power Supply

Features a field-replaceable modular power pack system.

---

### Large 33mm Output

Fully fills most day scope objectives, producing a brighter output image and maintaining the full exit pupil diameter at the eye.

---

### Easy Installation

Installs and removes without affecting boresight, eliminating the need for sight zero adjustment.

Model TANS-US

### Select from Three Different Models:

▼ TANS-US

▼ TANS-NATO

▼ TANS-EX

Made in the USA

## Trijicon® TANS (Tactical Advanced NightVision System)

Now darkness is an advantage, not a hindrance. When you have the Trijicon TANS mounted to your weapon, they can run—but they can't hide. The Trijicon TANS optimizes target acquisition in low-light conditions.

- ▼ The Trijicon TANS gives military users and law enforcement officers a night vision unit that is compact, rugged and easy to use. It's also highly effective.
- ▼ The Trijicon TANS mounts in front of a Trijicon ACOG®, maintaining boresight—allowing rapid aiming from a normal shooting position. It houses a fast catadioptric lens that collects the maximum amount of starlight for a brighter, sharper image.
- ▼ The Trijicon TANS is manufactured with a combat-strong aluminum housing.
- ▼ Designed for use with an ACOG and made with a low, 1.5-inch optical centerline that's free from parallax errors, the Trijicon TANS optimizes target acquisition in close quarter battles during low-light conditions.

Model TANS-US

Export of this product is regulated by the U.S. Department of State in accordance with the International Traffic in Arms Regulations (ITAR), per Title 22 Code of Federal Regulations, Parts 121–128. For additional information, please contact the Trijicon Export Compliance Team at 1-248-960-7700 or [exportcompliance@trijicon.com](mailto:exportcompliance@trijicon.com).

### Manual Focus

Adjusts from 1 meter to infinity. 270° rotation.

### Dual Fields-Of-View (FOV)/Magnification

7° FOV/1x magnification (for clip-on use with Trijicon ACOG®) or 14° FOV/0.5x magnification (for stand-alone use or increased situational awareness).

### Trijicon RMR™ (Ruggedized Miniature Reflex) Mount

Housing accommodates optional secondary sight.

### Military-Grade Magnesium Housing

Offers low weight and high strength.

### Long-Wave Thermal Imaging Sensor

640 x 480 resolution microbolometer (uncooled).

### Infrared (IR) Laser Pointer

Class 1 and class 3B laser. (Model ATWS22 ONLY)

### Trijicon ACOG®

Maintains the Trijicon ACOG's FOV and magnification—without altering the effectiveness of its bullet-drop compensator, battlesight zero, point-of-aim and point-of-impact.

### White-Hot / Black-Hot Polarity Toggle

Sight powers up in white-hot (default) mode, toggles between contrast modes to allow for changing conditions or operator preference.

### Manual NUC (Non-Uniformity Correction) Adjustment

Allows NUC when temperatures change or environmental conditions affect image quality.

Model ATWS22

For direct sales to governments and municipalities only.

Export of this product is regulated by the U.S. Department of State in accordance with the International Traffic in Arms Regulations (ITAR), per Title 22 Code of Federal Regulations, Parts 121–128. For additional information, please contact the Trijicon Export Compliance Team at 1-248-960-7700 or [exportcompliance@trijicon.com](mailto:exportcompliance@trijicon.com).

Made in the USA

## Trijicon ATWS™ (Advanced Thermal Weapon Sight)

Designed for military and law enforcement applications, the new Trijicon ATWS is a dual-use (hand held / stand alone – weapons clip-on) that delivers crisp imaging through total darkness, fog, smoke, or dust.

- ▼ The new Trijicon ATWS is a long-wave thermal imaging sensor that mounts in front of magnified optics like the Trijicon ACOG®.
- ▼ With a 7° FOV (Field-Of-View) and 1x magnification, the new Trijicon ATWS perfectly matches the FOV and magnification of the Trijicon ACOG 4x32.
- ▼ This allows shooters to maintain the FOV and 4x magnification of the target viewed through the Trijicon ACOG—without altering the effectiveness of the bullet-drop compensator, battlesight zero, point-of-aim and point-of-impact.
- ▼ The Trijicon ATWS also offers a 14° FOV with 0.5x magnification for a Trijicon ATWS/ACOG system magnification of 2x, allowing for greater situational awareness. When a target is identified, the shooter can switch to a 7° FOV and engage.
- ▼ The Trijicon ATWS is encased in a rugged, military-grade magnesium housing and powered by four CR123 lithium batteries in a modular cartridge that can be readily replaced with one hand, without the need for tools, and is mission capable for approximately five hours.

Model ATWS22

### RMR (Ruggedized Miniature Reflex Mount)

Housing accommodates optional secondary sight.

### Multi-use Design

Offers mission flexibility for use as a clip-on thermal weapon sight and as a rugged hand-help imager for a variety of scouting, surveillance, and covert operations.

### Longwave Thermal Imaging Sensor

Provides crisp imagery through total darkness, fog, smoke, dust, and many other obscurants.

### Manual Focus

Rotate objective, adjusts 2 meters to infinity.

### Military-Grade Magnesium Housing

Offers low weight and high strength.

### Trijicon ACOG

Maintains the ACOG's FOV and magnification – without altering the effectiveness of its Bullet Drop Compensator (BDC), battlesight zero, point of aim, and point of impact.

Model ACTS30

### Integral Laser System

Infrared laser pointer, class 1 and class 3B.

### Control Panel

Allows full support of weapon, while providing easy access to ACTS controls.

For direct sales to governments and municipalities only.

Export of this product is regulated by the U.S. Department of State in accordance with the International Traffic in Arms Regulations (ITAR), per Title 22 Code of Federal Regulations, Parts 121–128. For additional information, please contact the Trijicon Export Compliance Team at 1-248-960-7700 or [exportcompliance@trijicon.com](mailto:exportcompliance@trijicon.com).

Made in the USA

## Trijicon ACTS™ (Advanced Combat Thermal Sight)

Hand held or gunsight mounted, the Trijicon ACTS provides white-hot, high-definition images in the dark or through battlefield obscurants.

- ▼ The Trijicon ACTS is one rugged longwave thermal imaging sensor that ably serves two missions. Clip it onto small arms or the Trijicon Advanced Combat Optical Gunsight (ACOG®) for use as a thermal weapon sight. Alternately, use the small and lightweight ACTS as hand-held imager for surveillance and scouting.
- ▼ ACTS delivers crisp white-hot and black-hot imagery through total darkness, smoke, fog and other obscurants.
- ▼ Single buttons adjust basic images, and the sight is powered for up to nine hours with three CR123 lithium batteries in an easily replaceable cartridge.
- ▼ When mounted on the battlefield-proven ACOG, the ACTS delivers high-definition, uncooled thermal sighting with up to 4X magnification, while preserving reticle calibration, boresight and field of view.

Model ACTS30

## Trijicon® Accessories

As rugged and reliable as the optics themselves, Trijicon designs and manufactures mounts and accessories to the same high degree of precision, quality and reliability as Trijicon riflescopes and sights.

- ▼ A full line of mounts and related hardware bring Trijicon performance to owners of every leading brand of firearm – including Bennelli, Beretta, Browning, Colt, Glock, H&K, Mossberg, Remington, Savage, SIG, Winchester and more.
- ▼ Accessories from Trijicon serve to enhance performance or protect the optics when they are not in use. To meet a wide variety of needs, the line includes a full range of items such as polarizing filters, lens dust covers, anti-reflection devices, flipcaps, rubber eyepieces and more – including carrying cases and protective pouches.
- ▼ Visit [www.trijicon.com](http://www.trijicon.com) for a complete listing of accessories.
