

The Revolutionary Optics of the Zeiss Sports Optics Z-Point

Overview of Technical Data:

Dimensions and Weight:

Height (above rail): 1.5 in.

Height: 1.75 in.

Width: 1.42 in.

Length: 2.5 in.

Weight: ca. 3.53 oz.

Other Technical Data

Mounting: Snap-on clamping onto Weaver-rail

Field of View: 10.7° (56.4 ft. @ 100 yds.) at eye relief 50mm (1.97 in.)

Dot diameter: 3.6 in. @ 100 yds.

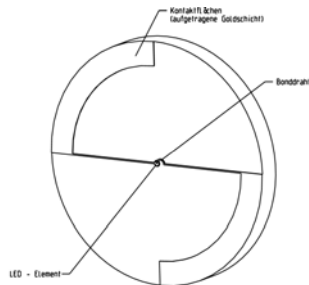

Adjustment Range: ± 72in. @ 100 yds. square: ±50.4 in @ 100 yds.

Transmission: T=78%

Environmental condition: Waterproof

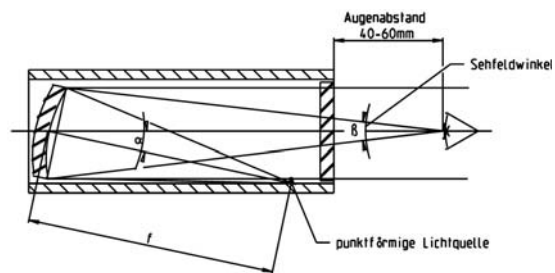

Environmental Tests: acc. to DIN ISO 9022

Exploring the Differences in Optics:

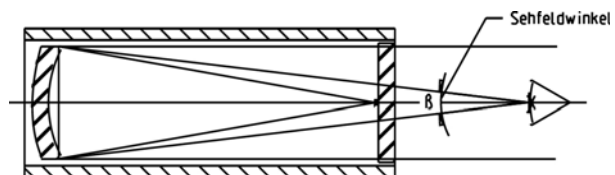

- **New configuration of the light source.**
[Hensoldt Patent]

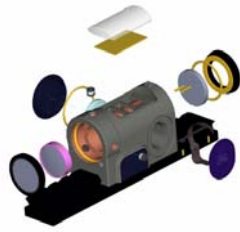

- **Standard Optics**

- **Z-Point with new optical configuration**

ZEISS SPORTS OPTICS INTRODUCES THE ARCHERY Z-POINT

**Start 2006 off right with this
Revolutionary New Product!**

Unique Product Features:

- Deadly accurate single red dot sight from 0-35 yards on today's fast shooting bows
- Eliminates the need for peep sights and rubber tubing
- Allows shooting with both eyes open – significantly increases low light shooting time
- Water proof, dust proof and not damage prone like pin sights
- Black high-alloy housing
- Compact - virtually half the size of other red dot scopes
- Clearly defined red dot is accommodating to the older hunter – no interference with depth perception
- Multi-use for gun, handgun, bow, crossbow with "Snap-On, Snap-Off" feature – Weaver Rail
- Automatically adjusts to surrounding light conditions
- Top mounted solar panel primary power source for extended lithium battery life
- Four hour automatic power shut off also saves battery life
- No protruding adjustment knobs
- Neoprene water-resistant cover included
- Available with Z-Mount Bracket for immediate installation
